Amendments to the Claims

This listing of claims will replace all prior versions and listings of claims in the application.

Listing of Claims

 θ_I

- 1-37. (Cancelled)
- 38. (Currently amended) The article of claim 37 43 wherein the adhesive is selected from the group comprising hot melt adhesives, pressure sensitive adhesives, curable adhesives, and filled adhesives.
- 39. (Currently amended) The article of claim 38 wherein the filled adhesive is selected from the group comprising electrically conductive adhesives, thermally conductive adhesives, and desicating desicating adhesives.
- 40. (Currently amended) The article of claim 37 43 wherein the circumference of the adhesive layer is greater than that of an electrode.
- 41. (Currently amended) The article of claim 37 43 wherein the article is an organic light emitting diode.
- 42. (Currently amended) The article of claim 37 <u>44</u> wherein the substrate comprises glass, the anode comprises indium tin oxide, the hole transporting layer comprises 4,4'-bis(naphthalen-2-yl)-N,N'-diphenyl benzidine, the light emitting layer comprises coumarindoped tris(8-hydroxyquinolinato)aluminum, the electron transporting layer comprises <u>bis(10-hydroxy-benzo(h)quinolinato)</u> beryllium, bis(2-(2-hydroxy-phenyl)-benzolthiazolato) zinc, 3,4,5-triphenyl-1,2,4-triazole, or 2-(4-biphenylyl)-5-(4-*t*-butylphenyl)-1,3,4-oxadiazole, and the cathode comprises lithium fluoride and aluminum.
 - 43. (New) An article comprising an organic electronic device which comprises:

- a. a substrate;
- b. an adhesive on the substrate;

c. a multi-layer structure comprising one or more organic layers between an anode and a cathode, wherein the adhesive surrounds the multi-layer structure;

:5

Cond

- d. a sealing layer; and wherein the adhesive is equal to the circumference of one or both of the substrate or sealing layer.
- 44. (New) The article of claim 43 wherein the organic layers comprise a hole transporting layer, a light emitting layer, and an electron transporting layer.
